Python - The Practical Guide  
Python (Hard)  
Working with Microservices in Go  
Clean Code  
Python Algorithms (Hard)

# Volodymyr Salo

Senior Software Engineer | Cross-platform (Linux/Windows) | C++/  
Qt/QML | C#/.NET | Python | Solution-first  
Vienna, Vienna, Austria

## Summary

Senior software engineer with 19+ years shipping cross-platform product software across Linux and Windows, including embedded/RTOS environments. I work comfortably across both ecosystems: Linux device/application development (C++/Qt/QML, Python) and Windows desktop/backend components (C++ and C#/.NET), with database-backed systems (SQL/Postgres).

### Recent focus areas:

Linux-based devices and applications: Qt/QML + Python, GUI + API development, and OS/service integration (D-Bus, systemd, NetworkManager, ModemManager, Bluetooth)

Windows desktop/product software: C++ and C#/.NET components, integration with SQL/Postgres-backed systems

Additional shipped domains: streaming-audio platforms (C++/Qt + Thrift) and set-top-box software (C++ + Haxe)

I'm solution-first and pragmatic about stack choice: I select technologies based on constraints (platform, performance, maintainability, delivery risk) and I take ownership through production debugging, troubleshooting, and on-call/3rd-level support in agile teams.

Open to: Senior roles in cross-platform product engineering across Linux/embedded and Windows/.NET.

Core stack: C++ • Qt/QML • Python • Linux • Windows • C#/.NET • SQL/Postgres

---

## Experience

Viewpointssystem GmbH  
Senior Software Engineer  
December 2020 - January 2024 (3 years 2 months)

Vienna, Austria

Thanks to innovative eye hyper-tracking technology, VPS 19 smart glasses measure eye movement so accurately, that the gaze point of the wearer can be determined without any misinterpretations. The discreet indication on the display lets you know exactly, and in real time, where the person is focusing their attention. This enables loss-free communication across language barriers and in noisy environments; saving both time and money.

## StreamUnlimited - #1 in Embedded Streaming / Voice Assistant Technology

Software developmental engineer

October 2018 - October 2020 (2 years 1 month)

Vienna, Austria

- StreamSDK (Implementation: Linux / C++ / thrift / Qt) – StreamUnlimited Engineering GmbH

StreamSDK is a flexible, multi-dimensional software solution, portable to various classes of silicon, which enables the application of streaming audio functionality to consumer electronics devices. Main languages – C++/Qt/thrift.

## TiVo

Software developmental engineer

July 2015 - May 2018 (2 years 11 months)

Odessa, Ukraine

- Tivo Central (Implementation: Linux / C++ / haxe) – TiVo, Inc.

Hydra product development for TiVo set-top boxes. Main languages – C++/HAXE.

## Lohika

Software developmental engineer

October 2013 - July 2015 (1 year 10 months)

Odessa, Ukraine

- Unified Functional Testing (Implementation, customer support: Win32 / Linux / COM / C++ / .NET / WPF / Silverlight / Java / Python / Motif / Gtk+) – Lohika, Inc. for HP Software

HP Unified Functional Testing (UFT) software, formerly known as HP QuickTest Professional (QTP), provides functional and regression test automation for software applications and environments. HP Unified Functional Testing can be used for enterprise quality assurance. Main languages – C++/C#.

## ABSoft

Software developmental engineer

February 2013 - September 2013 (8 months)

Odessa, Ukraine

- Spartan Desktop Softphone (Implementation, automated testing framework integration: Win32 / OSX / iOS / Android / C++11 / boost / Qt5 / QML1) –

ABSoft, Inc. for RingCentral

A desktop softphone client for the RingCentral cloud-based VoIP telephony system. Main languages – C++11.

## Luxoft

Software Engineer

September 2012 - December 2012 (4 months)

Odessa, Ukraine

- Ford Automotive in-vehicle system proof-of-concept (Implementation: Linux / C++) – Luxoft, Inc.

A proof-of-concept for in-vehicle entertainment system for Ford luxury cars.

Main languages – C++.

## SWLabs

Contract Software Engineer

August 2012 - September 2012 (2 months)

Lviv, Ukraine

- PokeTalk SIP browser integration (Google Chrome plugin implementation: JQuery / JS, Google API) – SWLabs

An international telephony system browser integration via plugin. Main technologies – JQuery/JS and Google API.

## SoftServe

Software Developmental Engineer\Technical Lead

July 2010 - July 2012 (2 years 1 month)

Ukraine, L'viv

- Config project group (Full release process, including design / work breakdown and estimation / implementation / quality assurance and control / delivery / integration: C++ / Java SE / VB6 / XML / Apache ant / Apache ivy / Apache Hudson / Jenkins / CPPUnit / JUnit / Linux / HP-UX 11 IA64 and PA-RISC / Win32 / Win64 / Oracle 9i to 11g / MSSQL2000 and 2008 / MS Access 2007 and 2010) – SoftServe, Inc.

A product lifecycle management toolset helps productmakers manage the full production lifecycle - from engineering to sales, with the special emphasis on

product configuration from the pricing point of view. Main languages – C++ and Java SE.

- Enterprise infrastructure state collection system (New features design/ implementation/testing, bugfixing: C++ / Qt3 / XML / Linux / Win32 / COM / .NET 3.5 / Oracle 9i / VMWare ESX) – SoftServe, Inc.

An enterprise configuration auditing and analytics solutions that provides clients with proactive view of the IT infrastructure to ensure critical business services remain operationally effective, secure, and compliant with internal and external standards. Enables the end user to collect data from various devices, networks, database servers united within a single network or distributed over different networks. Main languages – C++/Qt/MOC and C#.

InTechEnergo, Ltd.

Software Developer

February 2009 - July 2010 (1 year 6 months)

Lviv, Ukraine

SyndisEnergia (XML model part development/design: C++ / Qt 3 / Win32 / Linux / Oracle 9i / MySQL 4 / Apache Tomcat) – InTechEnergo

Various projects for SCADA systems and energetics, such as AnyModelDesigner – software for DB XML model transformations. Main language – C++/MOC.

Mikronika

Software Developer

February 2009 - July 2010 (1 year 6 months)

Lviv, Ukraine

Contractor from InTechEnergo, Ltd.

Telrad Networks, Ltd.

Optical Software Designer

February 2007 - December 2008 (1 year 11 months)

Lviv, Lviv, Ukraine

Traffic switch Ethernet-over-PDH (Application part development/design, unit tests: Embedded C++ / VxWorks 6) – Telrad Networks.

Hardware manufactured product with capabilities of Ethernet over PDH traffic transceiver. Main language – Embedded C++.

# Optera Metro product line (Application part development: Embedded C / C++ / PSOS) – Telrad Networks for NORTEL

Optical network switches. Main language – Embedded C++.

### ArtfulBits

Software Developmental Engineer

November 2006 - February 2007 (4 months)

Lviv, Ukraine

.NET 2.0 Vista-like widgets (development, modification, fixing: .NET 2.0 / C# 2005)

– ArtfulBits

Vista-style WindowsForms/ASP .NET visual components library for Visual Studio 2005/.NET 2.0/Windows XP SP2. WindowsForms part. Main language – C# 2005.

### SoftServe, Inc.

Software Developmental Engineer

March 2006 - November 2006 (9 months)

Lviv, Ukraine

Client-server trading application (mobile module — modification, fixing: C++, WinAPI / MFC; help files) – SoftServe, Inc.

Product simplifies big company's trade agent's work, performing all trading-related operations via PocketPC with data storage on PC on MSSQL database; data transfer is performed using IrDA and Bluetooth interfaces. The main platform – WinXP and WinCE/Windows Mobile.

- Geographic and climat information analyzing system (modification, fixing: C++ / Linux / X11, Motif / Xt / Xlib, OpenGL / ImageMagic) – SoftServe, Inc.

Product works with geographic and climate information, representing it using OpenGL. User can output result to TV-out. Project works on RedHat Linux and is written on C++ (Motif toolkit / Xt).

- Client-server test application (development: Java / SWING, JSP, Apache Tomcat, JBoss, WebServices, XML) – SoftServe University
