SUMMARY

Senior software engineer with 19+ years across embedded/RTOS and cross-platform product development. Recent focus on Linux-based devices and applications using Qt/QML and Python, including GUI and API development and Linux system integration (D-Bus, systemd, NetworkManager, ModemManager, Bluetooth). Equally comfortable with Windows desktop development, including modern C++ and .NET/C#. Solution-first and pragmatic about stack choice: I select technologies based on constraints (platform, performance, maintainability, delivery risk) and take production ownership (troubleshooting, releases, 3rd-level support/on-call) in agile teams.

CORE SKILLS

- Languages: C++ (incl. modern standards), Python, C#, Java, Kotlin, Go, SQL, Bash
- Linux: system integration with systemd, D-Bus, NetworkManager, ModemManager, Bluetooth; packaging/build tooling
- UI: Qt/QML (C++ and PySide2), Windows desktop UI stacks; Android UI basics (custom views)
- Backend/IPC: REST APIs (FastAPI), client-server apps, Apache Thrift, COM; microservice patterns (Go)
- Build/Dev tools: Git, CMake, Gradle, Maven, Yocto, unit testing (GoogleTest, JUnit), CI (Jenkins/Hudson)
- Datastores: PostgreSQL, MS SQL Server, Oracle, MySQL
- Embedded/RTOS: VxWorks, pSOS, QNX, Poky Linux; performance and resource-constrained environments

PROFESSIONAL EXPERIENCE

CGM Arztsysteme Österreich GmbH (formerly INNOMED) - Wiener Neudorf (Lower Austria), Austria | 06/2024 - 12/2025

Senior Software Engineer - Windows desktop medical practice software (C++, SQL, PostgreSQL; .NET/C# integration)

- Developed and maintained core features of a widely used Austrian medical practice management product across UI, business logic, and data access layers.
- Created concepts for new features and add-ons; produced technical documentation/specifications and supported implementation rollout.
- Handled production defect analysis and 3rd-level support (including on-call duty): reproduce, diagnose, and remediate customer issues in collaboration with support and QA.
- Implemented and reviewed database-backed changes (PostgreSQL/SQL) with focus on performance, correctness, and backward compatibility; supported releases in agile delivery.

Viewpointssystem GmbH - Vienna, Austria | 12/2020 - 01/2024

Senior Software Developer - VPS19 smart glasses (Yocto/Linux, Python, Qt/QML, system integration)

- Developed GUI and device workflows using Python (PySide2) and Qt/QML; maintained a production codebase with frequent releases.
- Implemented backend and REST API services in Python (FastAPI) to expose device capabilities and data flows.
- Integrated embedded Linux components and services: D-Bus, systemd units, NetworkManager/ModemManager connectivity, Bluetooth, and NTP time synchronization.
- Owned troubleshooting and 3rd-level support: log analysis, reproductions on constrained hardware, and hotfix delivery under customer deadlines.

StreamUnlimited Engineering GmbH - Vienna, Austria | 10/2018 - 10/2020

Software Development Engineer - Streaming audio SDK for consumer electronics (Yocto/Linux, C++, Qt, Thrift)

- Contributed across the full software lifecycle: goals/requirements, implementation, integration, deployment and production support for streaming platforms; supported adoption of emerging development standards and tooling.
- Developed and integrated streaming-audio functionality for embedded Linux devices; worked across SDK modules and product integrations.
- Designed and implemented APIs and cross-component interfaces using Apache Thrift; supported portability across silicon/SoC variants and partner integrations.

EARLIER CAREER (2006 - 2018) - SELECTED ENGAGEMENTS

TiVo, Inc. | 07/2015 - 05/2018

Lohika, Inc. (for HP Software) | 10/2013 - 07/2015

- HP Unified Functional Testing (C++/C#, COM/.NET, WPF/Silverlight, multi-platform support)

ABSoft, Inc. (for RingCentral) | 02/2013 - 09/2013

- Cross-platform desktop softphone (C++11, Qt5/QML, Boost; Win/macOS + mobile clients)

Luxoft, Inc. | 09/2012 - 12/2012

- In-vehicle entertainment proof-of-concept (Linux, C++)

SWLabs | 08/2012 - 09/2012

- Chrome plugin for telephony integration (JavaScript/jQuery, Google APIs)

SoftServe, Inc. | 07/2010 - 07/2012

- Enterprise configuration/lifecycle tooling (C++ and Java; CI/release tooling; Linux/HP-UX/Windows)

InTechEnergo, Ltd. | 02/2009 - 07/2010

- SCADA and energy systems UI/model tooling (C++, Qt3, XML; Windows/Linux)

Telrad Networks, Ltd. | 02/2007 - 12/2008

- Embedded networking/optical systems (Embedded C/C++, VxWorks, pSOS)

ArtfulBits | 11/2006 - 01/2007

- .NET 2.0 UI components (C# / WindowsForms)

SoftServe, Inc. | 03/2006 - 11/2006

- Linux/X11/Motif + OpenGL visualization systems (C++)

OPEN-SOURCE AND PERSONAL PROJECTS (GITHUB)

- dev-intensive-2019 - Android/Kotlin app demonstrating MVVM (ViewModel/LiveData), SharedPreferences, and custom ImageView widgets (multi-branch task progression).
- questions_answers - C++17 CLI Q&A manager with CMake build and GoogleTest coverage; demonstrates clean build/test workflow and code hygiene.
- libscoreboard - Java 21 library with Maven and JUnit 5; small, testable API surface.
- go-micro - Go microservices prototype exploring service boundaries, APIs, and service-to-service patterns.
- python-blockchain - Python 3 toy blockchain prototype exploring core primitives and basic validation (kept intentionally minimal).

EDUCATION

- Moscow Institute of Technology | 2013 - 2015 (incomplete)
- ITStep Computer Academy | 2003 - 2005 | Software development program
- Ukrainian Catholic University (UCU) | 2001 - 2004 | Philosophy/Theology coursework (incomplete)

LANGUAGES

Ukrainian - C2 | Russian - C2 | English - C1 (professional/technical) | German - B1 | Hungarian - A2 | Polish - A2
